Bsc.CSIT Student | Web Developer and Designer | Problem Solver | Cybersecurity Enthusiast

EXPERIENCE

During my time as a Bsc CSIT student, I actively participated in several web development projects, which provided me with extensive hands-on experience in both front-end and back-end development. I gained proficiency in technologies such as HTML, CSS, JavaScript, PHP and My SQL. Throughout the development process, I honed my problem-solving skills by identifying and resolving bugs and performance issues, which significantly improved the efficiency of my applications.

To manage my code and collaborate effectively, i utilized Git for version control, working through platforms like GitHub.
